

## For Sale or Expressions of interest.

The following vehicle is located in **Nagambie** Victoria and the family are interested in selling. The following photos are from about a year ago, I am waiting on more recent ones. If no members are interested, it will end up on fakebook or Ebay. The tailgate and Ute floor are the most rusted bit but like anything nearly 50 years old it may have more. As always it is the member's responsibility to make their own decision. If you are interested in discussing the vehicle with the owner, please contact Doug at **0448 404 055**

## Two news members looking for parts for restoration projects.

**Anthony** 0457 068 199, Geelong area, is restoring a Series 80 and is looking for a complete handbrake including handle and cables to the back brakes. Alternatively if anyone has had any made up a contact who can manufacture the cables would be good, we could add it to our records. It is for a Series 80, they are similar to the early Toyos, Ford and Holdens.

**Adam** 0422372203 is after the following parts for a Scout Terra that has been converted to a tray back.

RH lower door hinge - my one is stuffed but complete. I wonder about getting it repaired?

Heat pump

Climate control panel (heat, cool, defrost)

Door, window and windshield seals complete set.

Amber side marker assembly - I reckon I'll need this in order to get the RWC and I can't find it available currently.

Bench seat

Door locks knobs.

### **Less urgent the following.**

Mirrors

Sound and heat insulation

Carpets and roof insulation

Dash pad

Door panel set

Shifter housing

Shifter indicator panel

If anyone has any parts available, please contact Adam and have a chat, he is in the Castlemaine area.
